

Did you know spam filters on personal email addresses could prevent you from receiving important emails from StayWell? These emails include information on how to earn 1,000 wellness points so your family can remain eligible for the HealthPlus Option in the BP Medical Plan.

Action: Please set up your account to accept incoming emails from BPWellness@staywell.com

If you are a BP employee and use your BP email address for the wellness program, you will not have an issue receiving these emails since BP does not block StayWell.

If further support is needed, you can click on the support links below for major public domain email servers.
